K4 GOUGING TORCH

Max. Current Rating: 1000A
Min. Compressed Air Pressure: 80psi
Orientation of Torch Head: Angled

021-EWT0060

K4 GOUGING TORCH

The K4 style torch is angled to work efficiently with the natural angles and movement of the arm and wrist. This torch is rated to 800 amperes and is suitable for heavy duty metal removal applications in environments such as shipyards and pressure vessel shops. It will accept a wide range of gouging carbons, flat and rounded, from 3.9mm to 15.7mm diameter. This torch and cable package has a comparatively low weight, yet remains rugged and reliable in use.

All weldability gouging torches are designed for operator comfort and are highly efficient metal removal tools - ideal for speedy weld removal, back-gouging of weld roots and defect repair. In addition, heat input from these torches is low enough to avoid excessive metal deformation.
